

Kocide[®]
2000

Kocide[®] 2000 for Citrus: **Trusted, Proven and Reliable**

Kocide 2000 has been grower approved year after year. For over 50 years Kocide products have proven to be the most trusted and technologically advanced copper fungicides on the market. Kocide 2000 provides superior disease control with lower metallic use rates. Tested and proven by Universities around the world, Kocide 2000 effectively controls many citrus diseases and is available in convenient 4 and 10 pound bags.

The Kocide 2000 Advantage

- High bio-available copper formulation
- Better control than higher metallic coppers
- Optimum particle size
- Outstanding coverage and rainfastness
- Excellent mixing and handling
- Proven performance with Universities and growers
- Lower use rates
- Outstanding dry flowable
- Environmentally friendly – less metallic copper per acre
- Signal Word - WARNING

Kocide Protects Against Many Diseases

Kocide 2000 control a wide range of diseases and improve citrus quality and yield. Kocide products are an ideal fit in your citrus disease management programs and are excellent tank-mix partners. Kocide 2000 protects against bacterial diseases and other fungal pathogens and can be used throughout the growing season to protect your citrus fruit and tree production.

- Melanose
